

Features

- **Fieldline downloads**
Fieldline downloads will work even if IT blocks icon files.

Regression Fixes

- **Standalone Projects**
Standalone projects are working as expected again. Standalone projects are projects which only consist of surveys manually uploaded by the corrosion technician.
- **Random Action Plan State Bug**
Random action plans were failing to load in the browser. This was caused by legacy data structures. This issue has been fixed.
- **Random Chart Order Bug**
Some lines had their charts loading in an incorrect order. This has been fixed.
- **Share Button**
The share button had a bug with previous release. This has been resolved. In addition, the share button has been removed from personal projects.
- **Login Form Icons**
The login form icons were not properly centered. This has been resolved.
